Erasmus+KA220

A 24-month Erasmus+ project promoting sustainable ecological behavior in schools through creative and practical skills development. Involving six organizations from Romania, Bulgaria, Portugal, Italy, and Spain, we're building a greener future through education.

About EGSC

The European Green Schools Council (EGSC) project is a natural continuation of the eTwinning project focused on promoting sustainable ecological behavior in schools. This Erasmus+ initiative complements the ecological side with artistic and civic-participatory dimensions.

Our project brings together educators and students from across Europe to develop creative solutions for sustainable school management, combining environmental awareness with artistic expression and community engagement.

Project Duration

01.10.2025 - 30.09.2027

Priorities

Environment and fight against climate change
Development of key competences
Common values, civic engagement and participation

Topics

Green skills
Creativity, arts and culture
